this book presents the first comprehensive introduction to methods and methodologies in the humanities and social sciences in general and islamic studies in particular from a critical rationalist point of view the book aims to be a self sufficient theoretical and practical guide to the topics that it introduces it contains a large selection of fully worked out review activities and review questions plus topics for further discussion which are devised to assist readers to better understand the issues which are discussed in the book last but not least all efforts have been made to make sure that most if not all of the reading materials which are recommended in the book are not only of the highest quality but also freely available on the internet

the authors examine the relationship between social science and philosophy and ask what sort of work social science and an accompanying philosophy should do they reintroduce the question of ontology through the work of roy bhaskar the book argues against philosophising and is committed to a philosophical approach grounded in the social sciences

offers a collaborative exploration of the role of historical understanding in leading disciplines across the humanities and social sciences

designed as a basic text for an introductory interdisciplinary social science course power and society introduces students to key concepts in anthropology sociology economics psychology political science and history the text focuses these perspectives on a central integrative theme and interdisciplinary viewpoint the nature and uses of power in society power and society introduces students to some of the central challenges facing american society for example ideological conflict racism and sexism poverty and powerlessness crime and violence community problems and international relations focusing on controversy stimulates students interest and appreciation for social sciences

featuring over 1 800 concise definitions of key terms the dictionary of the social sciences is the most comprehensive authoritative single volume work of its kind with coverage on the vocabularies of anthropology sociology political science economics human geography cultural studies and marxism the dictionary is an integrated easy to use a to z reference tool designed for students and non specialists it examines classic and contemporary scholarship including basic terms concepts theories schools of thought methodologies issues and controversies as a true dictionary it also contains concise jargon free definitions that explain the rich sometimes complex language of these increasingly visible fields

according to their critics social scientists rarely ask the right questions and cannot provide satisfactory answers even to the questions they ask themselves social scientists often discuss the nature of knowledge in their fields with a notable lack of clarity explanation and experience in social science by robert brown dispels the confusion with cogency and wit it is a systematic sensible and lucid analysis of the nature of the explanations put forward by social scientists explanation making is first distinguished from describing and reporting and then classified into different types based on different kinds

of information used the greater part of the book consists in discussion and examination of these types of explanation and their relationships in which the usefulness and limitations of each are assessed an extraordinary variety of examples from contemporary work in all the social sciences is used including the fields of sociology anthropology psychology history demography political science and economics the author makes it clear that good social explanation is possible and that it conforms to the requirements of all good scientific explanation explanation and experience in social science is of interest to the practicing scientist in fact it is a must have for any personal or public library with collections in the social sciences most studies in the philosophy of the sciences natural and social fall into two distinct groups those written by philosophers for other philosophers and those produced by scientists for their fellow scientists the aim of this book is to discuss questions of philosophical interest as they come to be imbedded in the work of social scientists robert brown received a degree in anthropology at the university of new mexico and did field studies among american indians before taking up graduate work in anthropology and philosophy at the university of chicago he has been at the australian national university as well as a fellow of its institute of advanced studies

kim offers an accessible interdisciplinary textbook using systems theory as a framework to stimulate discussion about how the social sciences develop understanding of society and its evolution it promotes an integrated view of the social sciences by proposing politics economics administration and community as the core areas of society and explains their characteristics how they are moved by what kind of systems and how they have evolved through their interrelationships this book explains how the major areas of operate on certain structures and principles and how they have developed while maintaining certain relationships with each other the beauty of the entire field of social sciences lies in understanding society and social sciences as a whole and the relationships that intertwines it it is unique in that it

approaches social science from an eastern perspective using traditional eastern thought and social phenomena as examples in its explanations and proposes a methodology for understanding society that is different to traditional social science textbooks which use the application of natural science methodology and statistics to understand society designed for a wide range of students in sociology politics and economics encouraging interdisciplinary thinking and understanding it is written with citations of classical writings by social scientists including locke rousseau hobbes mill marx engels prudhon smith weber durkheim buber myrdal habermas popper hayek putnam and others through this book readers can gain panoramic insights into how the works of these social scientists are interconnected

john brewer explores the essential nature of the social sciences and the ways in which notions of impact and value could be reframed to generate a more productive debate around their contribution to the good of society

library and information studies for arctic social sciences and humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues trends and projects in library archival and information sciences within shared arctic frameworks and geographies including contributions from professionals and academics working across and on the arctic the book presents recent research theoretical inquiry and applied professional endeavours at academic and public libraries as well as archives museums government institutions and other organisations focusing on efforts that further arctic knowledge and research papers present local regional and institutional case studies to conceptually and empirically describe real life research in which the authors are engaged topics covered include the complexities of developing and managing multilingual resources working in geographically isolated areas curating combinations of local regional national and international content collections and understanding historical and contemporary colonial industrial influences in indigenous knowledge library and information studies for arctic social sciences and humanities will be essential reading for academics researchers and students working the fields of library archival and information or data

science as well as those working in the humanities and social sciences more generally it should also be of great interest to librarians archivists curators and information or data professionals around the globe

mainstream social science has come under fierce criticism in recent decades for failing to have more impact on public policy critics say the social sciences are incapable of generating knowledge that can solve social problems others contend that partisan politics and university administrations are the problem politicians are more concerned about special interests than scientific research and administrators care more about scholarly publications than solving social problems are the social sciences failing to live up to their promises have they outlived their usefulness have they become an ivory tower of babel like the babylonians who built the infamous tower of babel social scientists for the past two centuries have been building a tower of sorts only this time it's composed of knowledge rather than bricks the primary goal of these scholars anthropologists communication scholars economists political scientists sociologists and social psychologists has been to solve problems of social integration the babylonian tower was designed in part to unite people to one geographical area similarly social scientists see their tower of knowledge as a means for solving social problems such as poverty crime drug abuse inequality unemployment abuse of power that alienate people and groups from modern society the babylonians failed because of divine intervention according to the bible the social scientists aren't finished building their tower but according to critics the results so far look less like a tower of knowledge for solving social problems than an ivory tower of babel one in which social scientists routinely dispute each other's theories and data and even uncontested or well supported findings rarely influence public policy disputes over the nature of truth and knowledge are so commonplace in the social sciences that many scholars believe a social science which uses methods from the natural sciences is incapable of generating knowledge that can solve social problems this book examines the history and philosophy of the social sciences and theoretical and empirical research on the impact of social science suggestions are offered at the end for enhancing the impact of the social sciences a number of scientific articles and books have been

written about the impact or lack thereof of the social sciences on public policy but none has been written specifically to appeal to both academics and a broader market composed of the general public and students in both undergraduate and graduate level courses the author takes the reader on a journey inside one of the best kept secrets in higher education that much if not most of the research conducted in the social sciences has very little impact on public policy or on solving social problems are taxpayers getting their money's worth

rom harré has authored an impressive oeuvre that has inspired generations of scholars and practitioners his work has challenged the orthodox philosophy of science and social psychology the book brings together a careful selection of his key writings that gives readers a systematic introduction in the conceptual universe of this towering figure
